

The Delta Kappa Gamma Society International Texas State Organization

August 2017

Dear Chapter Presidents:

The 2017-2019 biennium promises to be an exciting time for Texas State Organization (TSO) of The Delta Kappa Gamma Society International. Our president, Jo Murphy, has set the theme of Bridging yesterday and tomorrow, and all the plans outlined in July begin the construction work of building that bridge.

One of the overwhelming ideas of the officers, committee chairs, ASTEF Board, and area coordinators is to continue to strengthen the Bridge of Technology that has been set up by the past technology committees. We have already begun research on what we can do to make information, training, and learning more accessible across the state of Texas via technology. As you know, we will be hosting the International Convention in Austin in July, 2018. Therefore, our TSO convention in Waco will be condensed into a much smaller format. Technology will play a larger role during that convention to get us started across that bridge. Once we have everything in place, we will continue building and reinforcing what we have.

I encourage each of you to embrace the role that technology can play in building your chapters and keeping everyone connected. We will continue the Technology newsletter that was initiated by last biennium's committee along with contributions through the Lone Star News.

As the Technology Committee 2017-2019, we are here for you. We will help you in any way we can in training, suggesting, research, etc. to build the skills of your chapter. Please contact me at any time with any questions that you or your chapter has. We look forward to working with each of you and serving your technology needs.

Sincerely,

Debbi Ball
TSO Technology Chair
